

## Wild Alaska Smoked Salmon

### Smoked Salmon Handling Tips

We believe in health and good taste! This product is of the highest quality wild Alaskan salmon.  
We do not add preservatives.

All of our smoked fish is hot smoked then retorted in a gold foil pouch. This retorting process slightly cooks the fish in it's own juices giving a moist flaky texture. You may store the fish at room temperature for up to 5 years, giving you the convenience of gourmet smoked salmon without the need to refrigerate. Perfect for camping, hiking, picnics, parties, or your own snack or favorite recipe.

When opening a fish pouch, be careful not to spill the juices inside. You may want to open over a sink. The liquid is a healthful and flavorful fish oil that was naturally released from the fish when retorting. The oil, which contains healthful omega 3, is a wonderful addition to any dips you are making.

Once the pouch has been opened, it can be stored in an airtight container in the refrigerator for up to a week. If you want to keep the open product longer, it should be frozen.

Enjoy your healthful, gourmet treat!
